Abstract of JP7182366

PURPOSE:To rearrange and appreciate still pictures on an electronic album and to retrieve still pictures roughly and in detail. CONSTITUTION: Reduced images 601 are listed and displayed in a negative film display area 600, and switched and displayed in order at a user's request. For the generation of the electronic album, reduced images 601 that the user selects are converted into album images 561 of default size 180X120 dots and arranged on page screens 560 at positions that the user selects or at default positions. For appreciation, the album images 561 are displayed on page screens 560 on the basis of album management information 43, page screens 560 are switched and turned over at a user's request, an album image 561 that the user selects is converted into an enlarged image 581, which is displayed in an enlarged image display area 580, and, other enlarged images 581 are displayed in order at a user's request and when the enlarged image 581 is edited, the image is reconverted into an album image 561, which is displayed on the page screen 560.
